

Gold retains its value not only in times of financial uncertainty, but in times of geopolitical uncertainty. It is often called the "crisis commodity," because people flee to its relative safety when world tensions rise; during such times, it often outperforms other investments. For example, gold prices experienced some major price movements this year in response to the crisis occurring in the European Union. Its price often rises the most when confidence in governments is low. Our 1-gram gold bars represent a great way to not only own gold, but to own it in a small and easy to trade size. Owning "fractional sized" metal means increasing to the number of buyers who will be available when it is time to sell your metal. Add gold to your investment portfolio **TODAY!**
